DETAILED ACTION

Allowable Subject Matter

Claims 38-48, 51-67, 70-96 are allowed.

The following is a statement of reasons for the indication of allowable subject matter: Regarding claims 38-48, 51-67, 70-96 there is no prior art of record that teaches a method of forming an active matrix display comprising: obtaining a substrate for use in a back plane of the display; forming a plurality of pixel control circuits on the substrate, each pixel control circuit comprising at least one three-layer two-terminal switching device and being configured to regulate light from a pixel; wherein forming at least one three-layer two-terminal switching device comprises forming a first electrode of the switching device; depositing a single layer of semiconductor from a solution over at least a part of the first electrode, wherein depositing comprises forming a patterned layer of the semiconductor; and forming a second electrode over at least a portion of the semiconductor overlying at least a portion of the first electrode.

Duthaler, as previously cited, discloses a method of forming a similar organic semiconductor deposition however Duthaler teaches forming a five-layer device wherein a multilayer semiconductor is used. It does not appear obvious to eliminate layers in Duthaler as the organic semiconductor is always paired with a dielectric layer or uses a multilayer P-N-P semiconductor.
